

Aztech to be headquartered in Kingston, ON with offices in Vancouver and the US

KINGSTON, ON; VANCOUVER, BC and ANNAPOLIS, MD -- Oct. 17, 2008

Aztech Associates Inc. announced today they have agreed to be acquired in a reverse takeover of Vancouver-based Decourcy Capital Corp. Decourcy will change their name on the TSX-V to reflect the Aztech branding. Aztech focuses on the development of products for utility customers on the emerging North American Smart Grid, as well as asset management products for the energy, shipping and natural resources exploration industries.

The resultant new company is one of North America's leading designers and manufacturers of products to support the energy industry. In the oil and gas sector, Aztech supplies equipment and software to manage remotely located assets and the transportation of radioactive substances. Aztech Smart Grid products for utilities and consumers are already being deployed by utilities in the U.S. and Canada. Trials for Aztech products on the Asian Rim and Europe are in active discussion.

The newest Aztech product is for utility consumers on the Smart Grid. Aztech manufactures the In-Home Display (www.aztechmeter.com), which shows consumers their energy use and cost in real time. Consumers who know these facts have been shown to use energy wisely. Utilities are able to offer consumers opt-in and out programs to save energy and money using the device.

Leaders in both Canada and the U.S. have stated that energy independence and development are keys to North America's economic future. Expanding exploration, renewable supply and conservation are national policies in both countries. "We expect Aztech products to be part of the energy independence solution," said Mike Evans, CEO of Decourcy, "This is a big part of the reason we agreed to acquire Aztech, and why our investors are bullish about Aztech's growth prospects."

Evans pointed to Aztech's In-Home Display as particularly exciting. "Consumers using In-Home Displays in tests over the past four years showed utility companies could pay back their investment in these devices in less than three years. With new incentives being put in place in both countries, the investment could well be recovered in as little as one year," said Evans.

Geoff Salter, President of Aztech said, "Consumers will be able to benefit in time to help them during the current economic downturn. Tests show consumers can shave 7-14% off their utility bills once the device is in their homes. In today's uncertain economy, putting In-Home Displays on the Smart Grid may be the very best investment a utility can make."

"Once In-Home Displays are in people's residences, utilities can offer unprecedented incentives to a consumer for reducing their demand," said Gardner McBride, Vice President of Business Development at Aztech. A Smart Grid with In-Home Display endpoints allows consumers the choice to opt-in or out of programs on very short notice," said McBride. "This is not easily done without the presence of an In-Home Display."

The Aztech In-Home Display is installed easily by the consumer, and is able to calculate the complicated pricing rates designed by utilities to encourage energy conservation. It connects wirelessly to smart utility meters (AMI) which are part of the Smart Grid.

About Decourcy Capital Corp.

Decourcy Capital Corp. (TSX-V: DRC.P) ("Decourcy") is a British Columbia company who announced on October 15, 2008 that they have entered into a Letter of Intent to acquire Aztech Associates Inc.

The acquisition is subject to TSX Venture Exchange approval, and will constitute the Company's qualifying transaction (the "QT") under TSX Venture Exchange (the "Exchange") Policy 2.4 – Capital Pool

Companies. On conclusion of the proposed QT, Decourcy will change its name to reflect the nature and character of the business of Aztech, with the Resulting Issuer trading as a Tier 2 Industrial Issuer on the Exchange.

The proposed QT does not constitute a Non-Arms' Length Transaction under the Policies of the Exchange. There are no Non-Arms' Length Parties to Decourcy, who are directors or insiders of Aztech.

The proposed transaction is conditional upon Decourcy successfully completing a financing sufficient to fund the business plan and to meet the listing requirements of the Exchange. It is the intention of the Company that the stock remains halted until the completion of the QT.
